

## Charging the Unit

The stock recorder comes with a cradle (sometimes called a docking station) that's used for charging the internal battery and for transferring data between the unit and the computer.

### Charging the stock recorder

1. Connect the power cord to the port in the back of the cradle and plug the other end into the mains power.
2. Dock the Stock Recorder into the cradle to allow it to charge. A small green light on the front of the stock recorder will flash during charging.
3. Allow at least four hours to fully charge the battery from scratch.

### Charging a spare battery

The cradle has a battery charger built into the back. When the stock recorder has only 5% remaining charge then a warning screen will suggest recharging the unit or changing to a new battery.

### Changing the battery

Access the stock recorder battery by removing the panel on the back of the unit.

1. Exit FarmWorks and switch off the stock recorder.
2. Find the fasteners on the back of the unit, close to the bottom.
3. Turn the fasteners out and upwards.
4. Gently pry the panel from the bottom.
5. Pull out the battery and replace.

# Learn the Keyboard

1. Switch on the stock recorder by holding down the **Power** button for a second.
2. Turn off by pressing the **Power** button once.
3. Press the **Shift** key once to type a capital letter. Press the **Shift** key twice to turn on **Caps Lock** so all letters are capitalized. Press the **Shift** key a third time to turn off **Caps Lock**.
4. To adjust the sound press the blue **Function** button twice, then press the + (plus) volume key in the centre to increase the volume or the - (minus) key to decrease the volume. Press the blue **Function** button once more when finished.
5. As a general rule the **Enter** button should be used to move from one field to another instead of tapping on the screen. This ensures that the data is processed and saved correctly.
6. If the keyboard stops functioning look on the bottom toolbar on the screen to see if the **Ctrl**, **Shift** or **Alt** key has been left on by mistake. Push the offending key again to turn it off.
