  - Mobile printers
  - Computers
  - Psion Workabout Pro
- Software supplied to enable a list of animals to be printed to attach to movement documentation
- Capability to communicate with other Shearwell Data Farm software (ask for details)

The SDL410S provides an easy to use reader that can be used to assist with individual movement recording necessary to comply with legislation. Animals can be stored in groups on the reader and uploaded to the PC or mobile printer. If required this data can be printed and attached to movement documentation. Up to 26 different groups of animals can be stored on the unit enabling multiple movements to be recorded without having to upload in-between.

This reader can also be used with the Workabout Pro Stock Recorder to enable a greater range for reading animals.

### Mobile Printer Specifications: -

Dimensions	140mm x 89mm x 42mm
Weight	160g including battery and one paper roll
Battery recharging	2 – 3 hours
Communications	Bluetooth
Power	Custom rechargeable battery – field replaceable
Paper	58mm Direct Thermal
Paper load	Easy load mechanism
